Modern facilities

Our company was established in Zaragoza in year 1967 and it is in this city where its headquarters is located.

In the city centre are the new offices, inaugurated in 2008. In its more than 900 m² the main services of the company are performed.

In addition, a general warehouse of 1.300 m² is focused on all logistics-related services.

The diversity of products being handled require managing different storage conditions, from -80° C to ambient temperature, as well as different means of transport.

Eight local offices in Spain and one in Portugal, constitute our distribution channel.

We **Comercial Rafer, S. L.** are a company whose activity is focused on the marketing of a wide and detailed catalogue of laboratory equipment, both clinical and industrial.

It might well be said that, given our commercial network and qualified personnel, we are considered as an average-high company in our field, with national business operation, as well as an office in **Portugal.**

Our detailed product catalogue is wide, basically consisting of international suppliers, mainly from **Europe, U.S.A. and Japan,** and includes diverse fields of activity: *Clinical Diagnostics, Research and Development, Environment, etc.*

At the same time, we collaborate with important research groups in the development of different projects.

reliability and commitment.

Full-time dedication

As a business company, we try to be as close as possible to our customers, in order to offer the best service and adapt ourselves to the new requirements and trends.

For this reason, we have commercial offices in the main peninsular cities.

Considering the increasing technological complexity of the products and equipment involved, the company has qualified personnel, featuring different technical/scientific skills. Nowadays, engineers, biologists, chemists, among others, work with us.

In this same background, the **Applications Department** has been optimised to provide an added value to the product, thus helping the customer in many ways:

- To implement different techniques
- To train the user in the product usage
- To collaborate with the laboratory in the analysis of difficult or problematic samples
- To train new personnel
- To organise technical sessions for knowledge exchange among different users

In order to give total support, we also have a **Service Department** with professional technicians, who provide assistance to equipment installed by the company.

Working areas

A wide product range complying
with the needs of our market.
Meeting the customer requirements
and attending national and
international trade shows
to study the latest novelties
in all the fields.

Clinical diagnostics, analytical instrumentation, research + development and general laboratory equipment are the areas where **Comercial Rafer** works.

Clinical diagnostics:

Auto-immunity, Biochemistry, Cytometry, Histocompatibility, Microbiology and Virology are some of our sections.

Analytical instrumentation:

We have equipment for elemental analysis, quality control, environment and clinical equipment.

Research and development:

Covering the market of Genomics and Proteomics with state-of-the-art technology.

Laboratory equipment:

Covering sections such as handling, dispensing, sterilization, sample preparation and storage.
