

Abgene Storage Plate, 96-well, 2.2 mL, individually wrapped

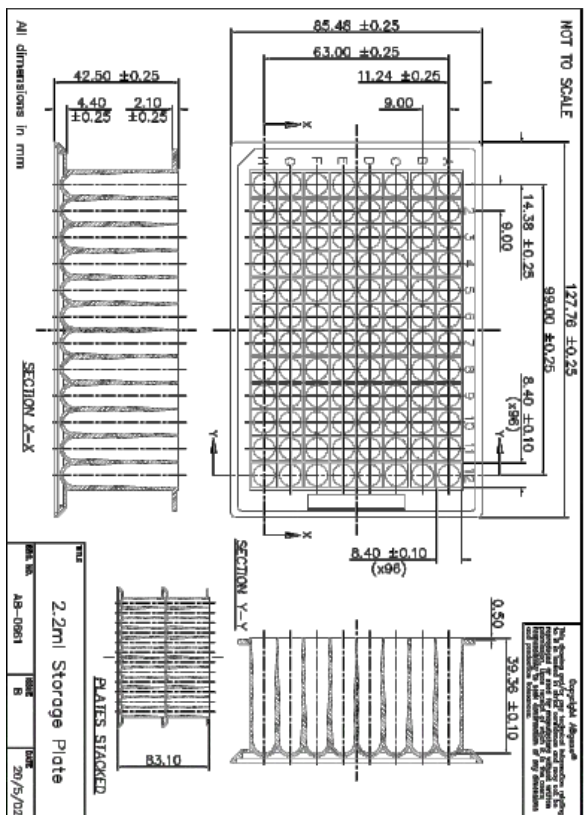

Thermo Scientific ABgene 2.2 mL polypropylene plates provide excellent solutions for sample storage and assay set-up, allowing dilutions and aliquots to be handled, stored, or transported easily.

Features of Thermo Scientific ABgene 2.2 mL storage and assay plates

- Designed for optimal sample recovery
- Each square well is specifically designed with an independent sealing rim to prevent cross-contamination
- U-bottom to aid resuspension

All plates are manufactured in our cleanroom facility to ensure molecular grade quality. All plates are ANSI format for compatibility with automated systems. To further assist in storage and tracking, all plates can be supplied with custom barcoding
